

[illegible]

This technical drawing illustrates a road layout. It features a central horizontal line representing a road, with a total length of 1300 units. The road is flanked by dashed lines, indicating lane boundaries. At each end of the road, there is a circular structure, likely a manhole or a small tunnel entrance, with a diameter of 40 units. The circular structures are shown in cross-section, revealing internal details. The road is divided into two sections by a dashed line, with a length of 1300 units indicated. The drawing is a technical sketch, likely for engineering or architectural purposes.
